

SAKSHAM GUPTA

B.TECH CSE (DATA SCIENCE) UNDERGRADUATE — FULL STACK DEVELOPMENT INTERN CANDIDATE

+91 8604994330 | samfgst3@gmail.com | Ghaziabad, Uttar Pradesh

github.com/S-AM-GUPTA | linkedin.com/in/s-aksham-gupta | portfolio-saksham-s-projects22.vercel.app

PROFESSIONAL SUMMARY

Computer Science undergraduate (final year, B.Tech CSE - Data Science) specializing in full-stack web development with the MERN stack. Hands-on experience building and independently deploying production applications — including a live, functioning marketplace platform and an AI-powered healthcare assistant — with skills spanning REST API design, real-time features, authentication systems, and responsive front-end interfaces. Fast learner, self-directed, and passionate about building impactful, scalable products.

EDUCATION

ABES Institute of Technology

Ghaziabad, Uttar Pradesh

Affiliated to Dr. A.P.J. Abdul Kalam Technical University (AKTU)

B.Tech in Computer Science (Data Science) | CGPA: 8.01

Currently in Final Year — Expected Graduation: 2027

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, C
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Redux (Basic)
Backend	Node.js, Express.js, REST APIs, JWT, Socket.io
Database	MongoDB, MySQL, Firebase (Realtime DB, Auth)
Tools & Platforms	Git, GitHub, Docker, Postman, VS Code, Render, Vercel, Firebase
Concepts	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Authentication, Authorization, Real-time Systems

PROJECTS

QuickMate — Hyperlocal Service Marketplace

MERN Stack, TypeScript, Socket.io, MongoDB

Full-stack, location-based platform connecting users with nearby helpers for daily tasks — independently built and deployed to production. Live at quick-mate.vercel.app.

- Independently managed the full deployment pipeline — version control (Git), environment configuration, and hosting on Vercel/Render — resolving configuration and deployment issues directly from the command line.
- Designed geospatial search using MongoDB 2dsphere indexing for real-time, location-based matching.
- Built secure authentication and role-based access (OTP/JWT) across customer, helper, and admin roles.
- Integrated real-time messaging and notifications using Socket.io.

VaidyaVaani — AI-Powered Healthcare Assistant

MERN Stack, AI APIs, MongoDB

An AI-enabled platform to simplify medical reports and prescriptions for everyday users — built and deployed for testing. Live at vaidya-vaani.vercel.app | Code: github.com/S-AM-GUPTA/VaidyaVaani.

- Built an AI-powered summarization pipeline to simplify uploaded medical reports into plain-language insights.
- Implemented a medicine-conflict detection module to flag unsafe prescription combinations across multiple medicines.

BazrLink — Hyperlocal Digital Commerce Platform

MERN Stack, MongoDB

A concept platform helping local retailers establish an online presence. In active development. Code: github.com/S-AM-GUPTA/BazrLink.

- Designing self-serve business onboarding and location-aware product discovery for nearby customers.
